

DEVELOPING THE BACKBONE FOR VEHICLES

BODY ENGINEERING
MÜNCHEN

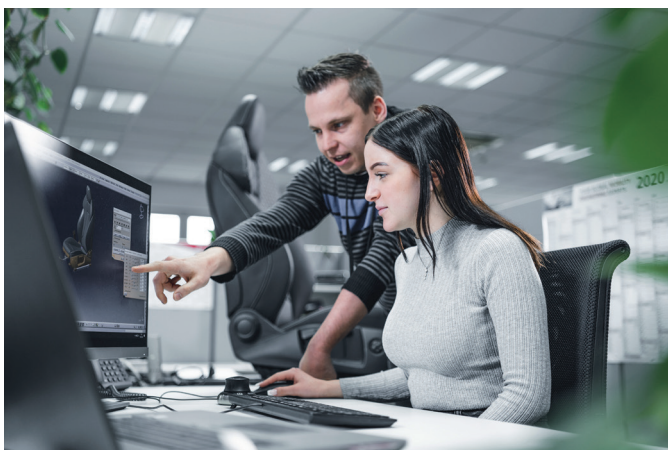

**YOUR GLOBAL MOBILITY
ENGINEERING EXPERTS**

What you see when you look at a vehicle, what you feel when you are using it and the comfort functions of a vehicle – **Everything is Body Engineering!**

The challenge to connect all of the other disciplines in automotive development with each other makes Body Engineering one of the most important and diversified fields of activity bringing an idea on the road.

To master this challenge EDAG BE München can rely on the experience from hundreds of projects with well-known manufacturers from almost every branch of the automotive industry.

No matter whether it's **Exteriors, Interiors, Body-in-white** or a combination of all, up until total vehicle challenges we have established expertise in all necessary areas to deliver development competence to the full extent.

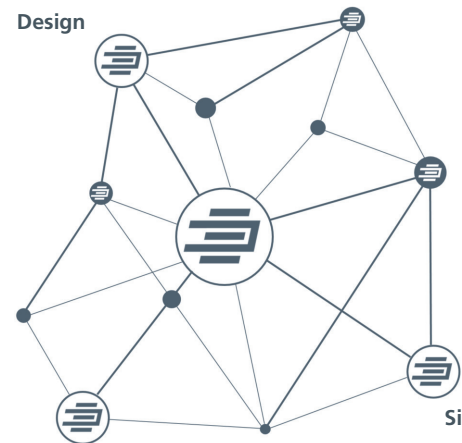

Our Performances in Body Engineering:

With our high flexibility, **distinct team spirit**, **methodological competence** and wide range of **know-how** in materials, design, production technology and strong enthusiasm for our customer's products, we are able to think **out-of-the-box** and deliver the most suitable solution to your Body Engineering challenge!
