

LIGHTWEIGHT DESIGN COMPOSITES

FASTER. STRONGER.
FURTHER.

**YOUR GLOBAL MOBILITY
ENGINEERING EXPERTS**

Connectivity – One megatrend that drives us in our decade. Living in networks requires technology to innovate our daily lives. To get there new technology will replace conventional production methods and mobility will no longer be categorized in different means of transportation but in mobility chains - **Efficiency** is the big buzzword.

Our Lightweight Experts at EDAG live that way of thinking in their daily work by integrating the lightweight idea into the products of customers from all different areas.

Our deep **knowledge** of new production methods and **materials** bring **down cycle time** and result in highly efficient designs with their strengths exactly where they are needed.

We are proud that we've been given the chance to show this through developing some of the most spectacular **sports cars** of our time.

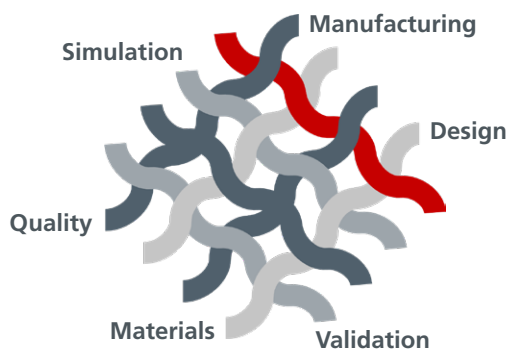

It is our **passion** to bring together new levels of innovation and **performance** to create extraordinary bespoke solutions.

Our Performances in Lightweight Engineering:

- Composite Design
- Manufacturing Concepts and Methods
- Simulation of Composites
- Composite Component Validation
- „Ideas to product“ expertise and support
- New product launch support
- Cosmetic and structural applications
- Bespoke materials design
- Material Expertise
- Additive Manufacturing
