

# EDAG ARMORING

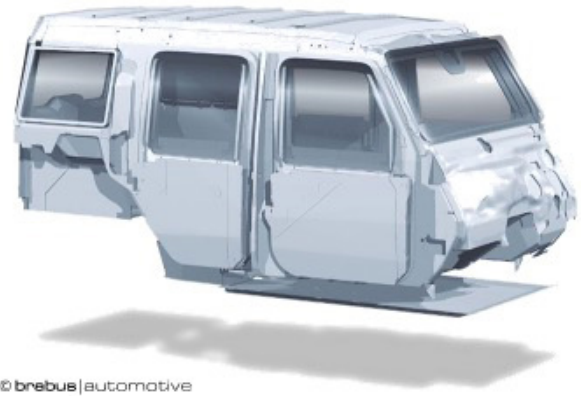

## DEVELOPMENT OF CIVILIAN ARMORED VEHICLES

As a specialized division of the **EDAG Group**, the EDAG Armoring team develops civilian armored vehicles.

In this field, we provide support with the development of the body, interior and exterior, and also with the integration of special attachments and conversions. With the experience our specialists have accrued over the years, you can rely on our know-how in ballistics, blast and certification. The wide range of services provided within the EDAG Group also enables us to offer all the development steps for your armored vehicle, for instance simulation & calculation, or automotive testing.

With our great flexibility and high quality standards - and not least because we speak the language of armored vehicle construction - we have established our position as a leading engineering service provider in this field.

As your trusted development partner, we will be happy to assist you with the efficient implementation of your future challenges and projects.
